

TRACK CLEANING

718-412-9040
www.SampsonMills.com

Sampson Mills recommended Track cleaning instructions:

- **Do not scrub with a hard brush**
- **Only use a soft microfiber cloth**
- **Do not scrub inside the channel.**
- Wipe up spills and smudges of dirt as soon as they occur.
- First: Clean with warm water / Apply a light solution of water to the Microfiber cloth.
- Second: Add a mild soap to water solution.
- For stubborn stains like ink, blot with isopropyl alcohol as soon as possible.
- Thoroughly rinse all solution residue with clean water.
- Towel dry.
- You may have to reapply Slick as a Fox if you get soap or isopropyl alcohol inside the track channel.

Though not all stains are guaranteed to be removed, the sooner you remove them the better.

Please use all cleaning agents safely and as instructed.

The use of other cleaning agents, disinfectants, conditioners or protectants is not recommended as they can degrade the traversing performance or ruin the track finish.
